# Artenliste mit Gefährdungskategorien

**Legende RL 2021:** **Kategorie:** Gefährdungskategorien gemäss UICN

| | |
|---|---|
| RE | In der Schweiz ausgestorben |
| CR | Vom Aussterben bedroht |
| EN | Stark gefährdet |
| VU | Verletzlich |
| NT | Potentiell gefährdet |
| LC | Nicht gefährdet |
| (DD | Ungenügende Datenunterlage - Kategorie nicht verwendet) |
| (NE | Nicht beurteilt - Kategorie nicht verwendet) |

**Kriterien:** IUNC-Kriterien für die Einstufung (Auswahl aufgrund der gewählten Methode, siehe Anhang: weitere Details siehe InfoSpecies 2021

| | |
|---|---|
| A | Abnahme der Bestandesgrösse im Zeitverlauf (früher, akuell oder zukünftig) |
| B | Geografische Verbreitung, verbunden mit Fragmenten, Abnahme eines Habitats oder Fluktuation |
| C | Geringe Bestandesgrösse, verbunden mit einer Abnahme des Bestandes |
| D | Sehr geringe Grösse des Bestandes oder des Verbreitungsgebiets |
| E | Qualitative Analyse des Aussterberisikos - nicht verwendet |
| ↓ | ↓↘ Rückstufung um eine bzw. zwei Kategorien im zweiten Einstufungsschritt |
| ↑ | Höherstufung um eine Kategorie im zweiten Einstufungsschritt |
| cd | "conservation dependent": Schutzmassnahmen (nur für die Kategorien NT angegeben) |

Bemerkungen: Ergänzende Informationen zum Gefährdungsstatus (z.B. Jahr des letzten Brutnachweises, akuelle Entwicklungstrends, Hintergründe zur Einstufung und zur Kategorienänderung gegnüber der Roten Liste 2020).

**1)** **= ab 2004 neu Mittelmeermöwe, welche in der CH hauptsächlich beobachtet werden kann. Siehe Zusammenfassung Mitarbeitertagung 2005**
